

Module 1, Water Consumption – The Water You Drink

1. How long can humans live without water?
 - a. 1 month
 - b. 4-7 days
 - c. 15-20 days
 - d. 2 months, depending on conditions
2. How much (in percent) of the human body is made of water?
 - a. 70%
 - b. 60%
 - c. 75%
 - d. 65%
3. Why is it better to drink tap water than bottled water?
 - a. Bottled water is not as clean as tap water
 - b. Bottled water has more chemicals in it than tap water
 - c. Tap water is less expensive than bottled water
 - d. Tap water has fewer calories than bottled water

Module 2, Water Systems – How You Get Your Water

1. Choose the most important job of a water utility:
 - a. Pumping water from source to utility and maintaining the pumping equipment
 - b. Ensuring public safety by posting “not potable” signs near treated water
 - c. Protecting public health by ensuring that water is safe to drink and use
 - d. Building and maintaining water storage tanks for water treatment plants
2. What could happen if you drink untreated source water?
 - a. You might become sick from germs and pollution in the water
 - b. You would be drinking fluoride and chlorine that the utility added to the water
 - c. Nothing, because the water is potable, which means it is safe to drink
 - d. Both (b) and (c) above
3. When a water utility delivers treated water to the public, the water travels to the public through:
 - a. Surface and/or groundwater supplies, or other potable water sources
 - b. The water system infrastructure that exists as a series of connected pipes
 - c. Lakes, rivers, streams, reservoirs, aquifers and other natural sources
 - d. None of the above

QUIZ

Module 3, Water Conservation – Becoming a Friend to Water

1. How much of the Earth's surface is water (in percent)?
 - a. 50%
 - b. 80%
 - c. 60%
 - d. 70%

2. Of all water on the Earth's surface, how much of it is suitable for drinking (in percent)?
 - a. 1%
 - b. 10%
 - c. 16%
 - d. 20%

3. Which of the following contribute to our limited supply of water? Choose all that apply.
 - a. Droughts
 - b. Changing weather patterns
 - c. Pollution
 - d. Conservation

4. Which of the following is NOT an example of a way to conserve water?
 - a. Taking more baths than showers
 - b. Checking toilets and faucets for leaks
 - c. Collecting rainwater in a barrel
 - d. Using a bucket rather than a hose to wash the car

QUIZ ANSWERS

Module 1, Water Consumption – The Water You Drink

1. How long can humans live without water?
 - a. 1 month
 - b. 4-7 days**
 - c. 15-20 days
 - d. 2 months, depending on conditions
2. How much (in percent) of the human body is made of water?
 - a. 70%
 - b. 60%**
 - c. 75%
 - d. 65%
3. Why is it better to drink tap water than bottled water?
 - a. Bottled water is not as clean as tap water
 - b. Bottled water has more chemicals in it than tap water
 - c. Tap water is less expensive than bottled water**
 - d. Tap water has fewer calories than bottled water

Module 2, Water Systems – How You Get Your Water

1. Choose the most important job of a water utility:
 - a. Pumping water from source to utility and maintaining the pumping equipment
 - b. Ensuring public safety by posting “not potable” signs near treated water
 - c. Protecting public health by ensuring that water is safe to drink and use**
 - d. Building and maintaining water storage tanks for water treatment plants
2. What could happen if you drink untreated source water?
 - a. You might become sick from germs and pollution in the water**
 - b. You would be drinking fluoride and chlorine that the utility added to the water
 - c. Nothing, because the water is potable, which means it is safe to drink
 - d. Both (b) and (c) above
3. When a water utility delivers treated water to the public, the water travels to the public through:
 - a. Surface and/or groundwater supplies, or other potable water sources
 - b. The water system infrastructure that exists as a series of connected pipes**
 - c. Lakes, rivers, streams, reservoirs, aquifers and other natural sources
 - d. None of the above
